Office Action Summary

Art Unit 1754

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) The invention was described in (1) an application for patent, published under Section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-24 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Saito et al. Saito et al. disclose an adsorbent for removal of undissociable organic impurities from hydrogen peroxide solutions at column 3, lines 47-53. Saito et al. teach

at such passage that a porous resin made of a styrene-divinyl benzene copolymer having no ion exchange ability and which is an organic adsorbent inert to an aqueous solution of hydrogen peroxide is especially preferred. There is no evidence on record which would establish that the adsorbent resin and method of use thereof as recited in applicant's claims 11-24 would necessarily be novel and unobvious over the adsorbent disclosed at column 3, lines 47-53 of Saito et al. Saito et al. specifically teach at column 3, lines 51-53 that the organic adsorbent is inert to the aqueous solution of hydrogen peroxide. Accordingly it would be expected that the organic adsorbent of Saito et al. would not contain any transition metal or other impurities, since Saito et al. discloses that the adsorbent is "inert" to the aqueous solution of hydrogen peroxide. It is further noted that Saito et al. disclose at column 5, lines 49-53 that decomposition of an aqueous solution of hydrogen peroxide does not occur when employing the synthetic adsorbent. Accordingly such adsorbent would not contain any transition metal or other impurities, since otherwise decomposition of the aqueous solution of hydrogen peroxide would occur.

Claims 1-10 are allowed.

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P.

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
